

**WEB – BASED APPOINTMENT SCHEDULER FOR SMART TEETH DENTAL CLINIC
REVISIONS LIST**

#	Name of Evaluator		Signature of Evaluator		Approved
	Mr. Tristan Unabia				
	Revision		Action		
	Question	Comment	Done Revision	Location in the Document	
1.	Responsiveness of the app.		We fixed the dashboard responsiveness so appointment updates appear automatically.	Located in source code, and can also see in the website.	
2.	Clarify the whole process of appointment — the doctor should be notified of the approved appointment.		Implemented an automated notification mechanism that alerts the assigned doctor whenever the assistant confirms or approves an appointment. Also added the whole process of appointment.	User’s Guide - Notification Module Methodology - Existing Process (Appointment Workflow)	
3.	Data validation.		Implemented field validation for the appointment form, including proper email and Philippine phone number formats. Added the “Send Code” button beside the email field to verify the patient’s email before booking.	Located in Scope: Verification and Confirmation Module and Appointment Module. Also located in User’s Guide in appendices	
4.	Include the estimated time for each service.		We’ve included the estimated time for each service. If a patient selects multiple services, the website will automatically calculate the total time needed and reserve the appropriate time slot.	Appendices – User’ Guide Test documents	

**WEB – BASED APPOINTMENT SCHEDULER FOR SMART TEETH DENTAL CLINIC
REVISIONS LIST**

5.	If a patient wants an appointment using HMO, the services should be filtered according to the provider's coverage.		We've added it to the limitations, since it's the clinic's responsibility to call the HMO Providers, not the appointment website.	Located at Limitations	
6.	Proper labels throughout the system.		Fixed gradient appearance and updated all system labels, especially in the assistant dashboard	Appendices – User' Guide	
7.	Appendices are incomplete, some is blank		Completed the appendices including the source code	Appendices	
8.	Appointment summary report.		We've added the Appointment Summary report	Located in User's Guide	
9.	Provide a feasibility study.		Added a Feasibility Study section outlining the project's technical, financial, and operational feasibility	After Technical Background, before Requirements Analysis.

	Question	Comment	Done Revision	Location in the Document	
1.	Email verification must be sent from the doctor’s account when the clinic assistant is not around.		Implemented the “Send Email” button under the Actions column in the Doctor/Admin dashboard. This function triggers the same email confirmation process that assistants use.	Located at the Requirements Documentation and Appendices User’s Guide.

	Dr. Frederic D. Yulo, MIM, DIT				
	Revision		Action		
	Question	Comment	Done Revision	Location in the Document	
1.	Provide all the revisions list from the previous term given by the panelist.		Added the list of revisions from the previous term as required by the panelists.	Appendix G – List of Revisions from Previous Term	
2.	Provide proof that you conducted research (from Capstone 1) to show that there is a need for such a system.		Added proof of research conducted during Capstone 1, including the interview transcript with the client and documentation of their manual appointment process using a notebook.	Appendix f - Proof of research conducted (capstone 1)	
3.	Validation for all fields must be implemented, including email address and phone number, etc.		Implemented field validation for the appointment form, including proper email and Philippine phone number formats. Added the “Send Code” button beside the email field to verify the patient’s email before booking.	Located in Scope: Verification and Confirmation Module and Appointment Module. Also located in User’s Guide in appendices.	
4.	Time of services must be considered when scheduling to ensure no overlapping will happen.		We’ve included the estimated time for each service. If a patient selects multiple services, the website will automatically calculate the total time needed and reserve the appropriate time slot.	Located at User’s Guide	
5.	In the report module, show: Number and types of services per day/week/month/year.		Implemented the generation of PDF reports for Services Analytics, HMO Usage, Appointment Success, and Activity Logs. Each report displays data per selected period (daily, weekly,	Located in Scope: Report Module
